Aptech has been built on an aspiration to impart knowledge to young minds. Aptech’s growth has been achieved by building professional relationships across the world. Founded and established in India, Aptech has built a strong presence across the globe with its modern training methods and technical expertise.

Based in Mumbai, Aptech commenced its training and education business in 1986 and has trained many students globally. Aptech has operations across the globe, with a focus on its main stream businesses - Individual training and enterprise business. Aptech is a pioneer in career education. As expert in vocational training, Aptech bridges the gap between traditional teaching methods and potential careers by enabling students to develop into job ready professionals.

With courses designed to impart knowledge in all areas of Information Technology, Aptech offers world-class education programs, methodologies, technologies, and international certifications. Aptech enables people across the globe to use I.T. optimally and efficiently through world-class training solutions. Today, Aptech students are working all over the world building knowledge corporations, communities and societies.

Aptech was honoured with India’s Most Trusted Branded Awards in 2016 under the category of Training and Education. Also, received two Apex 2010 - Awards for Excellence, was a Microsoft learning partner Award Finalist in 2014 and is among Brand Equity’s Top 50 Most-Trusted Service Brands, Aptech is one of the top 10 most trusted education brands and ready for future growth.

Aptech believes in imparting quality education using I.T. as the tool to empower its customers. To achieve our vision, we have created a performance-oriented work culture through learning, empowerment, innovation, teamwork, and transparency. We believe in and endeavour to empower our human capital, which is the most important resource for us.
Aptech Computer Education Programs

Career Programs
Aptech Computer Education offers programs enabling students to develop a complete understanding of the latest technologies in the I.T. industry. The programs are designed to train students in industry relevant knowledge and in-depth Professional skills. On completion of these programs, students become in-demand and industry ready Software Engineers.

Features of Career programs:
- Job-oriented courses and latest technology
- Focus on programming techniques
- Mobile and Web Application Development & Cloud Computing
- Data enterprise development
- Simulated projects
- Leads to global certifications
- Hands on training

Smart Professional Programs
Aptech's Smart Professional courses are professional courses wherein students are trained in the latest technologies. This enables them to be job-ready professionals.

Features of Smart Professional programs:
- Structured learning
- Experienced & Certified faculty
- Hands on Training
- Programs leading to Global Certification

Skill Builder Programs
Aptech offers Skill Builder programs with specialisation which are designed to cater to the needs of students, training them into skilled job ready professionals in a short period of time.

These programs are ideal for:
- Engineering & I.T. students who want to brush up on their I.T. Skills and fill the gap in their college education & to practice what they learnt in the classroom
- College students who wants to build I.T. skills during any time of their academic period
- For students of any age who wants to learn computers and build their basic programming skills

Global Certification Programs
Aptech offers the latest Technology Oriented modular programs from Microsoft, Oracle and JAVA in keeping with the demands of the I.T. industry. With training and a rigorous examination process, students receive globally accepted certification. Students are equipped with skills required to complete their desired course.

These programs are ideal for:
- Engineering & I.T. students who want to gain professional skills in a chosen field of specialisation
- College students who want to build advanced I.T. skills & get certifications recognised by I.T. companies
- Working professionals in I.T. who want to improve their career prospects with the help of certification

Why Global Certification programs?
- Employers prefer candidates with global certifications
- Surveys and published research show that certified professionals enjoy better salaries & better career advancement opportunities
- Global Certification provides a distinct edge over other I.T. professionals
Why Choose Aptech?

**Globally Certified Faculty**
The teaching staff at Aptech is well experienced and highly trained with adequate skills and knowledge to bring out the best in their students.
